# WELLWORX SOLUTIONS

---

Driving innovation across the well lifecycle

# About Us

WellWorx is an independent technical consultancy founded in 2023

WELLWORX SOLUTIONS

Drawing on decades of combined industry experience, we deliver innovative and tailored solutions for the upstream oil and gas sector.

# Why WellWorx?

Subject Matter Experts – well intervention from cradle to grave

Centralised project oversight with diversified strengths in engineering, technical execution, strategic sourcing and logistics

Proven technical expertise supporting effective interface management between clients, service partners, and regulators

Extensive network with Regional Service Community – collaboration

Intimate knowledge of end user requirements

Helping clients identify, evaluate, and implement the right technologies

Integration – complement customer's expertise

Well life cycle planning – proven global expertise

# Our Team

**JASON WHEATLEY**  
CEO

Well Intervention  
Expert

**MARTIN RYLANCE**  
Distinguished Advisor

Global Wells  
Expert

**OMAR ISHTEIWY**  
Senior Advisor

## Jason Wheatley Founder

Jason Wheatley is Founder & CEO of WellWorx Energy Solutions. A well intervention authority with 34+ years of international experience across Middle East, North Africa, Europe, Asia, and Latin America, he has led high-value projects for ADNOC, BP, and Schlumberger.

### Career highlights:

WellWorx Founder & CEO (2023–present)

ADNOC Well Operations Engineering Team Lead (2013–2022)

BP Jordan Well Intervention & Integrity Lead (2010–2013)

BP Colombia Senior Well Site Leader (2001–2010)

Schlumberger Coiled Tubing Instructor (1990–2001)

Specialized in mega-reach interventions, matrix stimulation, rigless P&A, new country entry, technology deployment, team development, contracts, and standards. Through WellWorx, Jason delivers elite professionals, project support, and premium technology solutions to the upstream well intervention sector worldwide.

## Martin Rylance Distinguished Advisor

Martin Rylance is an internationally recognized petroleum industry expert with a distinguished career at BP Exploration and THREE60 Energy.

Specializing in Hydraulic Fracturing, Stimulation, and Pressure Operations, he has worked across 12+ countries and 42+ global operations, with expertise in extreme HPHT, sour (H2S), and challenging tectonic stress environments from the Andes to the Pacific Ring of Fire.

He has pioneered new country entries, driven technology transfer, and led unconventional and tight-gas/tight-oil developments as Discipline Lead for Fracturing & Stimulation.

Additional strengths include Coiled Tubing Drilling and Multilateral well technology for enhanced reservoir access.

Former BP Russia Wells Manager responsible for joint-venture and technical operations, Martin now plays a key role in THREE60 Energy's global growth and capability expansion.

## John Johnson Senior Advisor

John Johnson offers 44 years of upstream oil & gas experience, with the last 30+30 years dedicated to rig-less well interventions.

Renowned for designing and delivering safe, cost-effective solutions on complex, damaged, or shut-in wells using coiled tubing, snubbing/HWO, wireline, slickline, and bespoke equipment, John consistently maximizes production while minimizing downtime in remote and challenging environments.

With a proven global track record across Asia, Middle East, South America, and Southeast Asia, he excels in multi-disciplinary project strategy, well diagnosis, client alignment, innovative engineering, rigorous well control, and operational excellence.

A trusted problem-solver and leader, John is recognized for turning high-risk well intervention challenges into safe, efficient, and value-adding successes.

## Damian O'Brien Senior Advisor

Damian is a 31-year global Well Operations expert specializing in drilling, completions, and interventions across 15+ countries.

Key milestones:  
Pioneered underbalanced CTD in the North Sea (SLB/BP)

Pioneered underbalanced CTD in the North Sea (SLB/BP)

Managed extreme HPHT H2S/CO2 wells and national crew training in Russia & Kazakhstan

Region Operations Manager at BJ Services (2002–2010): grew fleet by 20 CT units and introduced multiple industry-first tools/technologies

Consulted on complex subsea, heavy-oil, and ERD workovers (2011–2015)

Led Upper Zakum artificial-island operations at ZADCO/ADNOC Offshore (2015–2019) with flawless HSE and nationalization focus

Renowned for technical innovation, rigorous planning/risk management, QHSE excellence, and multicultural leadership in remote, high-pressure, and extended-reach environments.

## Omar Ishteiwiy Senior Advisor

Omar Ishteiwiy, with over 18 years in the oil and gas industry, is a renowned expert in hydraulic fracturing and stimulation. His diverse international experience includes significant roles with BP and Schlumberger, spanning the Middle East to the North Sea. Omar specializes in optimizing asset value across both conventional and unconventional assets, with a strong focus on innovative, environmentally conscious solutions.

A leader in technology transfer and team development, he has played pivotal roles in new venture start-ups and has been instrumental in driving strategy and operations in various leadership roles.

Omar's expertise is further underscored by his extensive contributions to the Society of Petroleum Engineers and his commitment to advancing industry knowledge through mentorship and training. Omar holds a Master of Science in Chemical Engineering from The Colorado School of Mines in Golden, Colorado, and a Bachelor of Science in Chemical Engineering from the University of Colorado in Boulder, Colorado.

# Projects

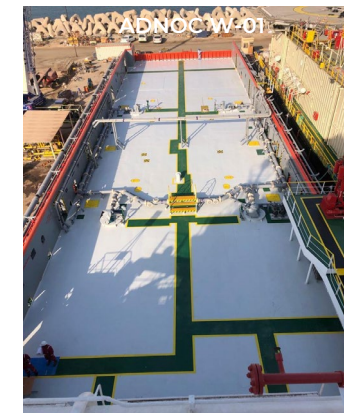

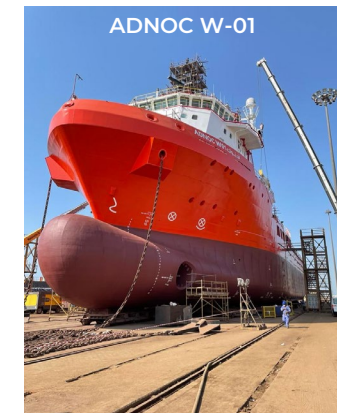

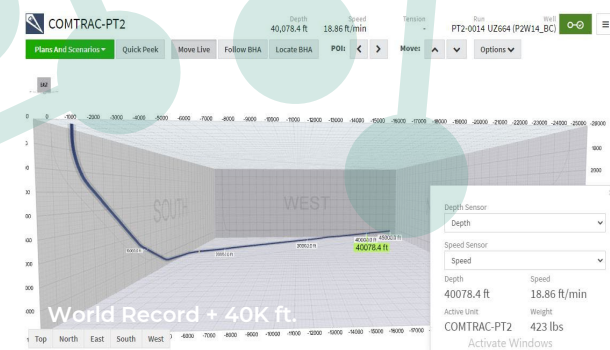

- + Weatherford - ADNOC Onshore Inactive Strings – Project Consultants
- + Dragon Oil – A&D Project Consultants
  - Basis of well decommissioning design and project execution engineering
  - Detailed SOW based on well architecture, geography, infrastructure, and environment
  - Feasibility studies , SOW and Vessel concept
- + ADNOC Offshore Artificial Islands WO – Department Head
- + Crest Victoria Stimulation Vessel – Project Lead
- + ADNOC W-01 Stimulation Vessel – Project Lead
- + ZMI Supporter Cantilever – Project Lead
- + UBCTD BP Colombia – Project Lead
- + Hydraulic Workover BP Colombia – Project Lead
- + Hydraulic Workover BP Oman – Project Lead
- + Concentric coiled tubing – Caspian, Middle East - Project Lead

UZ 750 Artificial Islands – World Records in Extended Reach Well Intervention

World Record in CT Intervention + 40K ft.

# Clients & Partners

Proudly serving the world's leading international and national oil companies, independent operators, and energy majors across the upstream sector – delivering outstanding results for clients who demand nothing less than the best.

## Project support

- + Weatherford - ADNOC Inactive Strings Project Management
- + Dragon Oil – Caspian Abandonment & Decommissioning
- + ADNOC - New Technology Deployment

## Agents for advanced technology solutions

- + UltraLine & DSL solutions
- + Liberating well data with AI
- + Advanced well chemistry
- + Next-generation coiled tubing conveyed solutions
- + Innovative hydraulic fracturing solutions
